			Stratmans	

This ultra-nourishing treatment replenishes the lips as you sleep. The mask forms a semi-occlusive protective layer to help deliver hydration to the skin while still allowing it to breathe.

Procedure

Melt phase A ingredients at 85-90 °C. Add phase A1 under stirring. Homogenize until a clear gel is obtained. Add phase B and homogenize again shortly. Premix phase C and heat to 70-75 °C under stirring until saccharin is completely dissolved. Add phase C and D ingredients directly to the main vessel. Cool to 70 °C and fill into suitable packaging.
