ULTRA PERFORMANCE

ULTRA PERFORMANCE

People want more hydrated skin with natural benefits that they can achieve anywhere, at any time. Masks are on the rise, and the mask market is further branching out and getting more sophisticated. Numerous body-specific masks for the chest, arms, and presumably the hands have been launched recently. Trending treatments target specific problem solution needs as well as ageing issues. In Korea there is already a high-performance product for everything, from your cuticles to your lips. Additionally, body skin care will become as important as skin care for the face. Consider it the Brazilian approach to anti-ageing; these products tend to beautify the body's largest organ from top to toe. Sure, Brazil's weather leads to greater exposure of flesh than colder climes, but given that the skin is always prone to dryness and irritation, everyone actually has good reason to keep it hydrated, and therefore healthy!

There has been a continued blurring of the boundary between skin care and food. The crossover between food and cosmetics has been going on for the past few years, and with new terms still transferring between the two industries, appears to be a persisting trend. Especially the term "superfruit" is still one of the latest buzzwords in connection with cosmetics and personal care. As superfoods and particularly superfruits are usually rich in vitamins and minerals, they match perfectly with highly effective treatment products.

RECOMMENDED FORMULATIONS

Technology, R&D, and innovation are the tools to develop and create solutions that are not only environmentally and ethically respectful, but that also give consumers high-performing advanced materials. As long as consumers are concerned with the impact of pollution and a more stressful lifestyle, they look for innovative skincare solutions with a link to the natural soul of formulations.

These amazing and effective skin and body care products make everyone feel pampered and downright gorgeous. Ultra performance products are the perfect combination of bringing the spa home and using a highly efficient product with a natural touch.
